Officer John C. Coyle, of the Twelfth, left his post without permission on the night of Sept. 2. He said his only child was lying dangerously ill at his home, and that his love for his offspring in this instance was stronger than his regard for duty.

Michael Nolan, of the Twenty second, was five hours late for roll on morning of Aug. 31. He said there was nobody to call him. James Trunk, of the Twenty-sixth, made a similar excuse.

To-Day's Programme-The Weights for the Bridge and Slayflower Handlcaps.

The announcement of the postponement of the Sheepshead Bay races in the morning papers yesterday took racegoers by surprise, especially as the weather proved to be bright and clear. The Execufearing that the beavy rains which fell Tuesday night would cause damage to the Futurity course, decided that it would be better to announce a postponement and give it publicly by the morning papers than wait until noon and then have to post-pone. Fortunately the rain did no damage at Sheepshead Bay. A World reporter visited the track in the afternoon and found that the warm sun and drying wind were being used for general laundry purposes, clothes hanging out to dry from many of the stables. The sun and to dry from many of the stables. The sun and wind, with the aid of harrows and a gang of men with rakes, were doing good work both on the Futurity and the old track, and the chances are if there is no rain during the night and the morning is clear and warm that an excellent track will be had for to-day's races. The programme is as follows; there may, however, be some additions or changes among the probable stariers for the Speed Stakes and Great Eastern Handleap, for if the Futurity course is good Mr. Withers may run the Faverdale colt at 182 pounds:

An Evenino Women reporter was in the lobby of the New York Hotel a tew days ago. A decorator and sasistants were renovating the walls and ceiling. The means were not very elaborate, consisting as they did of paper hangings. Squares of paper with borders of different colors were in the general plan of the redecoration.

As the reporter glanced around he noticed the men working on the bottom of the stairway which runs from the hall to the second floor. They had marked this out with a border. The stairs were evidently wider in one portion than another, and as the border was of the same with throughout, the effect of Miss Amelia Summerville, a study in black (loquitur): "I'm studying at present with George Sweet, the baritone, and I can really hardly recognize my voice, it has improved so wonderfully.
